

PURPLE ICE

Purple Ice® is a high performance radiator conditioner. It's advanced 2-In-1 corrosion inhibitor and wetting agent provides year-round defense against corrosion, Purple Ice also reduces the surface tension of the radiator coolant to help reduce engine temperatures,

REDUCES COOLANT TEMPERATURES

Extensive testing confirms Purple Ice reduces coolant temperatures better than comparable products while providing extra corrosion protection, For example, the average operating temperature of a 350 c.i.d, V8 engine (equipped with 160° thermostat) when dyno-tested with different coolants are:

- A. Standard mix of water and glycol (antifreeze) — 228°F
 B. 50/50 water/glycol mix with Purple Ice added — 222°F
 C. Straight water (no corrosion protection) — 220°F
 D. Water with Purple Ice added — 200°F

PERFORMANCE ADVANTAGES

- Reduces surface tension of a coolant allowing more heat to transfer outside the radiator resulting in more horsepower
- Reduces hot spots in the engine and cylinder heads, reducing the possibility of engine failure
- Helps prevent overheating, keeps the system clean and extends the life of the water pump
- It's safe to use with water-only or antifreeze/water blends

JAVASOL KEVERÉS

- Fagyállóval alkalmazva:
1 oz, / quart of cooling system capacity
- Tiszta vízzel alkalmazva:
1,5 oz, / quart of cooling system capacity

*Minimum 20% fagyálló javasolt személyautóban

A termék technikai adatlapja a gyártó nyilvánosan elérhető adatai alapján készült.
