

## PURPLE ICE

Purple Ice® is a high performance radiator conditioner. It's advanced 2-In-1 corrosion inhibitor and wetting agent provides year-round defense against corrosion, Purple Ice also reduces the surface tension of the radiator coolant to help reduce engine temperatures,

### REDUCES COOLANT TEMPERATURES

Extensive testing confirms Purple Ice reduces coolant temperatures better than comparable products while providing extra corrosion protection, For example, the average operating temperature of a 350 c.i.d, V8 engine (equipped with 160° thermostat) when dyno-tested with different coolants are:

- A. Standard mix of water and glycol (antifreeze) — 228°F  
 B. 50/50 water/glycol mix with Purple Ice added — 222°F  
 C. Straight water (no corrosion protection) — 220°F  
 D. Water with Purple Ice added — 200°F

### PERFORMANCE ADVANTAGES

- Reduces surface tension of a coolant allowing more heat to transfer outside the radiator resulting in more horsepower
- Reduces hot spots in the engine and cylinder heads, reducing the possibility of engine failure
- Helps prevent overheating, keeps the system clean and extends the life of the water pump
- It's safe to use with water-only or antifreeze/water blends

### JAVASOL KEVERÉS

- Fagyállóval alkalmazva:  
1 oz, / quart of cooling system capacity
- Tiszta vízzel alkalmazva:  
1,5 oz, / quart of cooling system capacity

\*Minimum 20% fagyálló javasolt személyautóban
